PRECISIONCORE

PrecisionCore: The World's Most Advanced Printing Technology

With over 40 years of expertise, Epson has perfected the chip manufacturing process. Powered by PrecisionCore, our printers are disruptively simple, smart and clean, delivering incredible performance and image quality, with low maintenance and energy consumption, across a wide variety of applications.

Epson produces over 15 million printers every year, with permanent printheads designed to last the life of the printer. From our industrial SurePress® digital label presses to our retail inkjet printers, the PrecisionCore print chip is at the core of virtually all of our printing solutions.

Business Inkjet Printers

Consumer Inkjet Printers

ColorWorks® Label Printers

SurePress Industrial Label Presses

SureColor® Large-Format Printers

Make an Impact with Epson Printers

From brochures and labels to promotional items and outdoor signs, you can expect exceptional color, quality and detail from Epson printers powered by PrecisionCore.

A Technology for the Future

Simple

Engineered for Reliable Performance

The all-in-one design contains the functional printing elements of the printer on one remarkably thin chip.

Smart

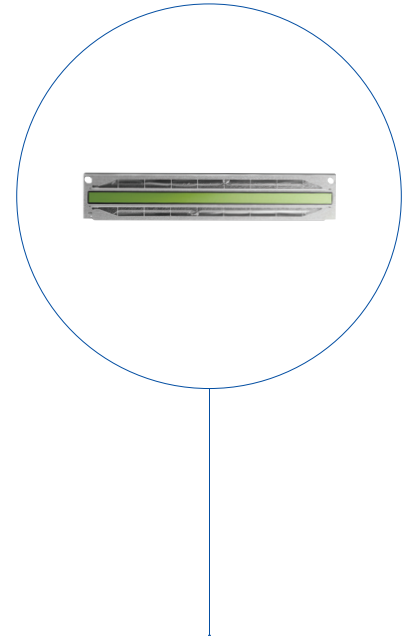

Built for Productivity

This scalable and modular solution delivers consistent quality with no warmup time required, resulting in less downtime and fast first page out.

Clean

Designed for Efficiency

Heat-Free technology is designed for efficient ink usage and low power consumption to help minimize waste and decrease energy consumption.

PrecisionCore Print Chip
