Print Technology	PrecisionCore Heat-Free	PrecisionCore Heat-Free

Why upgrade from the C7500 to the C8000?
See the video now.

¹ Part of the ink from the first cartridges/packs is used for initializing the printer. Ink usage will vary considerably based on images printed, print settings, paper type, frequency of use, temperature and humidity. Variance may be more pronounced when printing infrequently or predominantly with one ink color. Ink is used for printing and printer maintenance, and all colors must be available for printing. For print quality, a variable amount of ink remains after the "replace ink" indicator comes on.

² All features of this system require an active Internet connection and the use of a supported browser.
